

Import CAD assemblies instantly with automatic recognition

Retrieving CAD assemblies for costing (quotation) or for manufacturing (sheet metal CAM) often requires the use of several software tools and implies repetitive and time-consuming tasks. With Almacam Assembly importer, a module that is integrated in Almacam software, importing CAD assemblies becomes easy and quick by allowing the processing of any type of assembly parts (sheet metal parts, tubes and supplies), either for quotation- or for manufacturing- purpose, with Almacam Quote and Almacam Cut/Punch software applications respectively.

An assembly import tool

for both quoting and manufacturing

A single tool for importing a variety

for importing a variety of parts (2D and folded parts, tubes and profiles, supplies)

Efficient algorithms

for the automatic recognition of the assembly parts and their properties, resulting in significant time savings

A user-friendly assistant

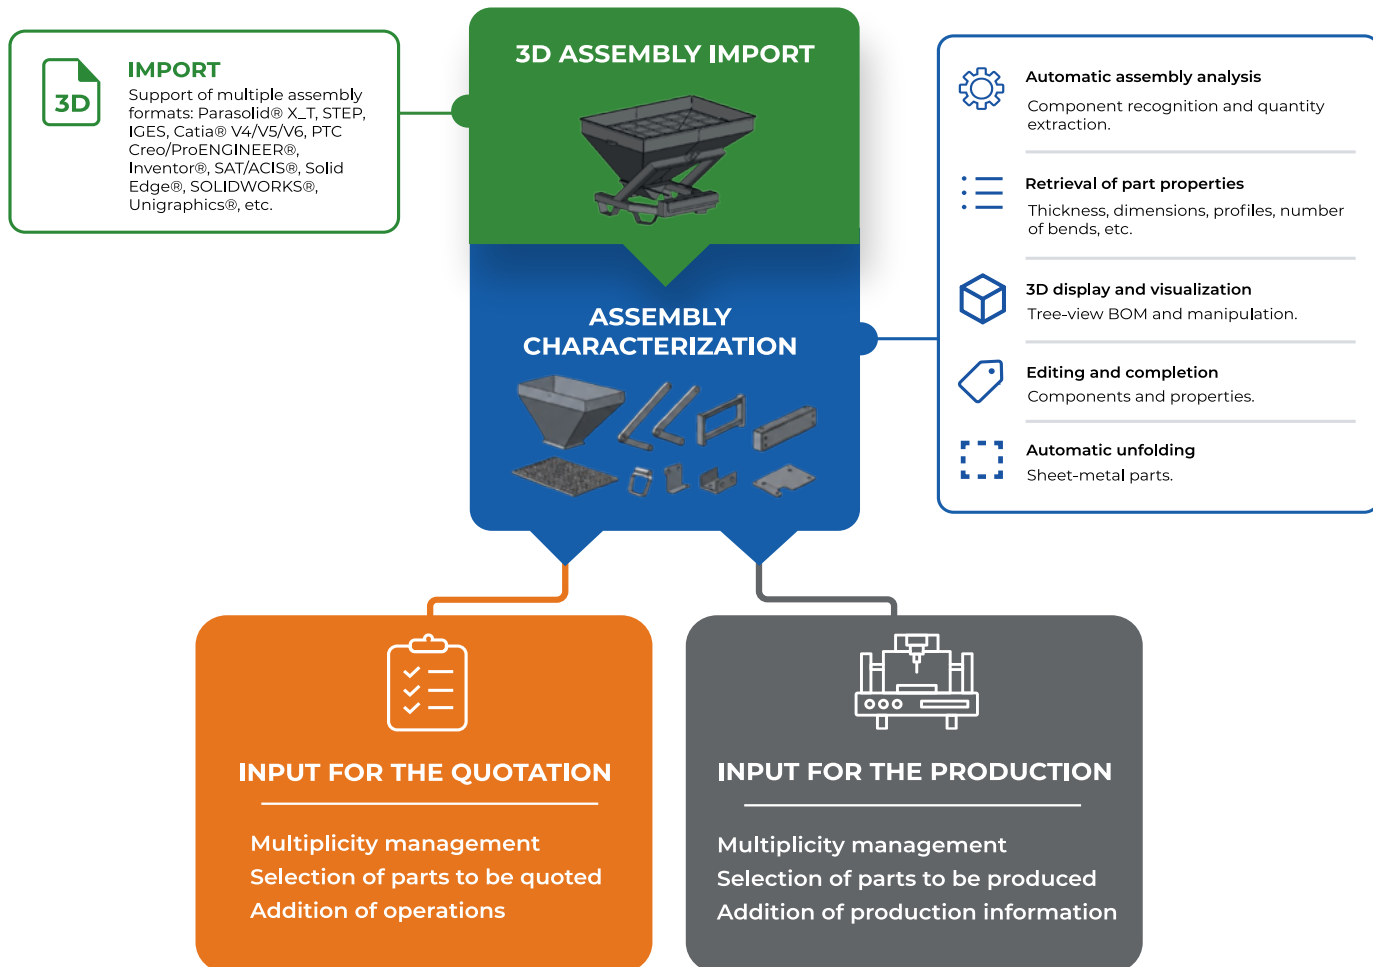

allowing to easily complete the information of the assembly and its components

The automatic retrieval

of quantities for the parts to quote or manufacture

The automatic unfolding

of sheet metal parts

**Experience the difference of
a true CAD/CAM partner**

Cooperative by nature.
Expertise at the core
since 45 years.
